

In the dairy sector, packaging is more than a container—it's a critical component of the supply chain. As products like cheese, ghee, dahi, and ice cream move through complex distribution networks, often under refrigerated or frozen conditions, packaging must endure temperature fluctuations, moisture, and handling stress without compromising its integrity

This is where Hem Packaging excels. Our high-performance corrugated solutions are engineered to survive the demanding conditions of cold chain logistics, ensuring that your products remain securely packed from origin to destination. Every solution is tailor-made for customer needs, balancing durability, cost-efficiency, and brand presentation.

## Solutions That Perform Under Pressure

- Outer Corrugated Boxes: Designed for strength and moisture resistance in refrigerated and frozen environments
- Custom Fit Designs: Precision-engineered for jars, tubs, and pouches to minimize movement and damage
- Sustainable Options: Eco-conscious materials that meet global food-grade standards without compromising performance.

## Why Industry Leaders Trust Hem Packaging

- Cold Chain Compatibility for reliable performance in low-temperature logistics.
- Food-Grade Certified Materials for hygienic handling and safety.
- Custom Branding to enhance shelf presence and consumer confidence.
